

ALERT

There has been a recent increase in vehicles thefts involving Ford F-250's and F-350's. There are a number of these vehicles in Pine Hollow so I wanted to alert those folks as to what is happening. Friendswood PD has seen several of these vehicles stolen as well. With Pine Hollow sitting right in the middle of this area I thought you all should know. I don't know why these are the target vehicles, but I think they may be fairly easy to enter for those in the business. There is a plastic housing around the door latches that can be popped or cracked and then entry is made within seconds.

One thing that gives people a problem is that these trucks are usually too long to park in a garage, but if you can take preventative steps maybe we can limit the damage or stop it before it gets to our neighborhood. We're watching at night, but if you guys will continue to watch out for your neighbors and call us if you see something we've got a better chance to catch the bad guys. Thanks.
