

Potential Robbery – 09/24/07

One of our neighbors had some new bedroom furniture delivered by a reputable furniture store in Dickinson. When the delivery guys were left alone for a minute in their master bedroom, they unlocked the window on the side of the house. Both locks were completely opened- on the window. This was after they had asked several questions about some new major sized electronics we had in our home- Our neighbors were very fortunate to have caught this and alert enough to prevent a potential robbery.

The Pearland Police department recommended they let their neighbors know about this incident. We simply want to make you aware in order that if you see anything unusual around our home or anyone's home please call the Police
